

Portuguese Language Division

Candidate for Administrator: Eloisa Marques

I have been a translator and editor for more than twenty years, both as a free-lancer and as staff at the Inter-American Development Bank, a multilateral development institution. If elected, I will strive to continue the excellent work done by previous PLD administrators and contribute with my experience to:

- attract new members and help establish a mentoring program whereas experienced translators will help beginners in the profession with guidance and information;
- revitalize the PLD newsletter, providing a forum for members to express their ideas;
- continue to organize biennial division meetings, bringing together experienced professionals, PLD members and people interested in the translation and interpretation profession;
- raise the profile of our division within the ATA and represent the PLD members in dealings with other organizations inside and outside the ATA.

I will listen to the concerns and ideas of the PLD members and with the help of my fellow officers guide the division forward to become the main reference for clients in search of professional standards and quality in translation and interpretation from and into Portuguese.

Eloisa Marques
